GMC

EMERGENCY TYPE AMBULANCE

At AmbulanceMed, we take great pride in our commitment to transforming GMC brand vehicles into top-of-the-line Emergency Ambulances, and our latest creation, the GMC Emergency Ambulance, is no exception. Manufactured at our state-of-the-art facilities in Dubai and Ankara, this ambulance is designed to provide unparalleled medical care, ensuring optimal sanitary conditions and comfort for both patients and medical professionals. With meticulous attention to detail and cutting-edge technology, the GMC Emergency Ambulance sets a new standard for excellence in emergency medical services.

As AmbulanceMed, we apply our American type ambulance on GMC vehicles and as such, we encounter many demands from the Middle East. In this ambulance model, which is called Type II according to American standards, coating and cabinet systems made of fiberglass material are used on vehicles of the GMC brand. On the left side of the vehicle are cupboard systems and a fixed oxygen system for medical equipment. There are also drawers for medical supplies and a doctor's seat on the vehicle's separator wall. Upon the request of the user, a single-seat or two seats can be placed on the right instead of the bench. However, the lower parts of the workbench can also be used as a storage area.

As a leading manufacturer of medical vehicles, we are dedicated to serving not only local communities but also extending our reach worldwide. Our GMC Emergency Ambulance is exported to various countries, ensuring that people around the globe have access to top-tier emergency medical services.

The GMC Emergency Ambulance exemplifies our unwavering commitment to excellence, safety, and innovation. With its unmatched patient care facilities, ergonomic design, efficient lighting and warning systems, and revolutionary WAS assistance systems, it stands at the forefront of the medical vehicle industry. Together, we strive to elevate emergency medical care and make a significant impact on countless lives across the globe. Choose AmbulanceMed - your trusted partner in delivering exceptional medical vehicle solutions.

- The GMC Emergency Ambulance is equipped with an energy-efficient lighting system, providing ample illumination for medical procedures without excessive power consumption. Our special warning system is meticulously designed to garner attention while being conscious of energy use. The combination of effective lighting and warning systems ensures a safe passage through traffic, allowing the ambulance to reach its destination swiftly during critical emergency situations.

At AmbulanceMed, we believe in equipping our medical vehicles with the latest technologies. The GMC Emergency Ambulance comes equipped with cutting-edge WAS assistance systems, including Door Assist, Multi-Load Assist, SanSafe, and Smart Check Mobile. These state-of-the-art technologies simplify the daily work of the medical team, streamlining operations, and enhancing overall efficiency during emergency responses and medical procedures. With a relentless pursuit of innovation, our GMC Emergency Ambulance empowers medical professionals to deliver exceptional care in every critical moment.

- The GMC Emergency Ambulance by AmbulanceMed showcases the latest medical technology, revolutionizing emergency healthcare worldwide. With advanced features and a focus on safety and comfort, it sets new standards in the industry, delivering exceptional medical services.

AMBULANCE INTERIOR

At AmbulanceMed, we take great pride in outfitting the GMC Ambulance interior with the latest technological advancements, staying at the forefront of modern emergency medical services. Our company is committed to providing the highest standard of care, and we have meticulously designed the GMC Ambulance to exceed those standards.

The interior is thoughtfully furnished with cutting-edge, customized equipment, ensuring it is fully prepared to handle any emergency situation. From state-of-the-art medical devices to intuitive and user-friendly layouts, every detail has been carefully considered to meet the specific needs of emergency responders and patients alike. When it matters most, you can trust that the technologically advanced GMC Ambulance from AmbulanceMed will deliver optimal care without compromise.

Ambulancemed

TECHNICAL AND MEDICAL EQUIPMENT IN *GMC AMBULANCE*

As Ambulancemed, we apply our American type ambulance on GMC vehicles and as such, we encounter many demands from the Middle East.

In this ambulance model, which is called Type II according to American standards, coating and cabinet systems made of fiberglass material are used on vehicles of the GMC brand. On the left side of the vehicle are cupboard systems and a fixed oxygen system for medical equipment. There are also drawers for medical supplies and a doctor's seat on the vehicle's separator wall. Upon the request of the user, a single-seat or two seats can be placed on the right instead of the bench. However, the lower parts of the workbench can also be used as a storage area.

The GMC Emergency Ambulance is equipped with 4 LED lamps and 2 spot lamps for its cabin lighting system. Conveniently located in the driver's cabin, the control allows easy adjustment of illumination. The control panel in the vehicle cabinet enables efficient and customizable lighting options for the ambulance cabin.

The GMC Emergency Ambulance features a cutting-edge digital electric panel, serving as the centralized control system for the vehicle. Strategically located in the patient cabin, just beside the sliding door, this advanced panel combines digital functionality with user-friendly touch-screen capabilities. Emergency responders can efficiently manage and control diverse aspects of the ambulance through this intuitive interface, ensuring smooth and seamless operations during critical situations.

The GMC Emergency Ambulance is equipped with a patient cabin heater, ensuring optimal comfort during transportation. The heater functions on either a diesel motor or an aqueous system, efficiently maintaining a cozy environment in diverse weather conditions. Moreover, the ambulance features a specially designed right-side door, facilitating easy patient transfer for smooth loading and unloading operations.

**The floor covering of the ambulance is formed as a single piece. It is skidproof. It can be easily cleaned and washed with water. It is antibacterial. It has a high resistant against combustion and structural chemicals.*

TECHNICAL AND MEDICAL EQUIPMENT IN *GMC AMBULANCE*

-Outdoor Lighting of the Ambulance

There is outdoor lighting that works simultaneously with 6 blue and red ambulance headlamp on the outside of the ambulance.

-Cupboard System of the GMC Ambulance

It is used PVC coating based on foamboard material in the GMC ambulance cabinets and the cabinet systems. Ambulance cupboard covers can be manufactured as orange, blue or white. The materials used in the covers are antibacterial. It is used foamboard material which has a 17mm thickness in the cupboard covers. Foamboard material is manufactured as 1.1k/m³ intensity. The materials are compatible with 95/28/EC standards, which are non-flammability.

Ambulance coverings are manufactured as one piece. Materials used in the ambulance have ABS principle; in addition, they are antibacterial and fireproof. They can be easily washed. Covering material is manufactured as compatible with EN1789 norms.

-Air Conditioning of the GMC Ambulance

The ambulance has a split air conditioning in order to cool the patient cabinet. Fuel consumption is less than one liter in an hour. Its weight is less than 10 kilograms. Air conditioning of the ambulance is used in different capacities depending on the geographical regions.

-Stretcher Platform of the GMC Ambulance

In the middle of the ambulance patient cabinet, there is an ambulance stretcher platform, produced with stainless steel, located in order to facilitate movements of the stretcher. This platform is able to carry a patient whose weight is at least 250 kilograms. Also, it has 10g crash test certificate, which is compatible with 1789 standards.

TECHNICAL AND MEDICAL EQUIPMENT IN *GMC AMBULANCE*

GMC Ambulance Main Stretcher

Ambulance stretcher, manufactured from stainless ethyl 61(AA 6351) material, is mounted on the ambulance platform. The ambulance stretcher is produced compatible with EN1789 and EN1865 norms. There are 4 stretcher wheels, which have a 15cm or 20cm diameter, on the ambulance stretcher. It is provided to make CPR application on the main stretcher.

The wardrobe, ceiling and side coverings of the patient section of GMC ambulances are manufactured from fiberglass material in the form of molds and mounted in the GMC vehicle. The floor coating of the ambulance is coated with anti-bacterial anti-slip material epoxy. The exterior lighting lamps of our GMC ambulances can also be applied in the form of American type ambulances. The oxygen system outlets in the GMC ambulance are designed as German, British and French types according to customer preferences.

GMC ambulance electrical installation and interior lighting are equipped with high standards of materials and workmanship. Color-coded cables are used in the electrical installation and LED fluorescents with night mode in the interior lighting.

Seats of the GMC Ambulance

There are two seats in the patient compartment that they:

- Produced as being compatible with EN1789 norms
- Have the 10g crash test certificate
- Are in the same direction with the vehicle
- The backrest and the seat part is produced from high strength sponge material.
- Have a 3-point seat belt
- The seat part is designed as collapsible

TECHNICAL AND MEDICAL EQUIPMENT IN *GMC AMBULANCE*

The external surface of the ambulance is covered with aluminum. The internal side is covered with glass wool material which has 20mms thickness. The whole materials used in the covering are compatible with EN1789 norms. There is an intermediate partition located between the driver and patient cabinet. There is a swivel window in the middle of the intermediate partition in order to enable communication between the driver and the health employee. In addition, there is an intercom communication system in order to enable voice communication between the driver and patient cabinet.

GMC brand vehicles are used in our ambulance designs called American Type II. GMC brand vehicles are offered with gasoline and diesel fuel engine options. However, the GMC brand ambulance mostly works with gasoline engine type and it is preferred.

Our ambulance designs are generally in demand from the Middle East countries, as we mentioned above. As well as requests from South American countries. One of the most important reasons for preferring our GMC ambulances is the accessibility of spare parts and reasonable maintenance costs of GMC vehicles in countries such as the Middle East and South America.

At AmbulanceMed, we prioritize advanced technology in every ambulance. Our goal is to customize each vehicle with state-of-the-art equipment, tailored to meet the unique needs of emergency medical services. From cutting-edge medical devices to user-friendly layouts, we ensure optimal functionality and care. Trust AmbulanceMed for top-notch service in any situation with our technologically advanced ambulances.
